

The Right Connection™

FloTech FT530 Trailer Identification Module Reader

Dixon Bayco introduces the FT530 Trailer Identification Module Reader designed to read and test Scully type TIM modules mounted inside API compatible overfill sockets.

Testing your TIM module is now as simple as 1,2,3. Simply connect the TIM reader to your socket, press the RED test button, and check if the displayed serial number matches the number on the TIM module. Press RED test button twice to illuminate LCD back light.

FloTech FT530 TIM Reader is compatible with both API Optic and Thermistor sockets. Simply interchange the J-Slot screws to match the socket. Internal lithium battery lasts a minimum of 5 years depending on use. Unit is self-contained and shipped with a hard shell storage case.

- reads Scully type TIM modules
- back lit LCD display
- solid aluminum construction
- interchangeable Optic or Thermistor J-Slot screws
- 5 year battery minimum depending on use
