- welds to standard 7" aluminum hose tube
- stainless steel spring
- lockable
- quality cast aluminum

TDF8 **8" Tube Door**

- welds to standard 8" aluminum hose tube
- stainless steel spring
- lockable
- quality cast aluminum

Tube Doors

Dixon Bayco presents a new line of hose tube doors for the transportation industry.

Heavy Duty Construction: Bayco tube doors are manufactured using a heavy duty cast design to withstand the rough handling and harsh environment found in tank truck applications. Solid, one-piece stainless steel hinge pins reduce damage to the lid assembly. Our door lock uses a heavy duty one-piece spring that holds the door closed and withstands severe handling.

Security and Safety: Safety and security are critical issues in the transportation of sensitive bulk products. All Dixon Bayco tube door assemblies provide a locking pad so the door may be locked or a tamper proof security seal installed. When you need security or safety think Dixon Bayco.

Promote Your Good Name: Promote your good name through our private label feature. Our aluminum cast tooling is designed to accept your company name or logo. A one time tooling charge and minimum order applies. Contact the factory for details.
